Name \_\_\_\_\_ Date \_\_\_\_\_

1	The human heart is:  <b>A</b> made of muscle. <b>B</b> a pump. <b>C</b> has four chambers. <b>D</b> beats faster when you exercise. <b>E</b> All of the above.
2	The <b>lub dub</b> sound of the heart beating is the sound of:  <b>A</b> the muscles of the heart contracting. <b>B</b> the heart valves opening and closing. <b>C</b> the blood moving in and out of the heart. <b>D</b> the blood moving in and out of the lungs.
3	The heart valves do all of the following, <u>EXCEPT</u> :  <b>A</b> separate the atria and the ventricles. <b>B</b> keep the blood flowing forward. <b>C</b> regulate the heart's contractions. <b>D</b> include the mitral valve and bicuspid valve.
4	The blood comes back to the heart from the body through two big veins called the:  <b>A</b> pulmonary veins <b>B</b> right atria <b>C</b> aortas <b>D</b> vena cavas
5	The first chamber of the heart the blood from the body enters is the:  <b>A</b> left atrium <b>B</b> right atrium <b>C</b> left ventricle <b>D</b> right ventricle

6	The valve between the right atrium and the right ventricle is called the:  <b>A</b> bicuspid valve <b>B</b> tricuspid valve <b>C</b> mitral valve <b>D</b> None of the above.
7	The blood is pumped to the lungs from the heart through the:  <b>A</b> aorta <b>B</b> pulmonary veins <b>C</b> pulmonary arteries <b>D</b> vena cavas
8	The most muscular, powerful heart chamber is the:  <b>A</b> left atrium <b>B</b> right atrium <b>C</b> left ventricle <b>D</b> right ventricle
9	The blood leaves the heart to the body through the:  <b>A</b> aorta <b>B</b> pulmonary veins <b>C</b> pulmonary arteries <b>D</b> vena cavas
10	The only veins in the body that carry oxygenated blood are the:  <b>A</b> subclavian veins <b>B</b> pulmonary veins <b>C</b> coronary veins <b>D</b> vena cavas
